All about grading

Last Modified on 02/24/2026 11:59 am EST

The article describes basic Canvas grading capabilities. There are advanced features that may also be of interest.

> **Before You Start**
>
> You will need a Canvas site containing graded assignments.

Table of Contents

General Information

There are many features you can use in grading student work.

Read More

Top

Using the Gradebook

The Gradebook lets you enter and post assignment scores for your students, and allows you to...

Top

Using SpeedGrader

SpeedGrader is focused on grading and feedback on submissions, allowing you to...

Read More

Top

Downloading Assignments

You can download submitted work individually or in a single batch.

Read More

Hiding/Revealing Grades

Canvas sites are configured to hide all grades unless they are revealed, or *posted*. (This was formerly known as *muting*.)

Read More

Exporting and Importing

You can export and import to the gradebook.

Read More

Setting a Late Policy

You can now apply automatic grading rules to missing and late submissions.

Read More

Arranging, Sorting, and Filtering

You can arrange, sort, and filter your gradebook in a number of ways.

Read More

Grading Offline

You can grade submissions offline and then upload the results to Canvas.
