# Linking to Articles and Files

Last Modified on 09/24/2021 3:23 pm EDT

This article explains how to link to files from assignments, pages, or other places in your course site.

## Linking to Articles on the Web

To link to a publicly available article on the web:

1. Copy the web address of the article.
2. Go to the page or assignment in which you want the article link to appear.
3. Create a [hyperlink in the Rich Content Editor](#), then save changes.

Not all publications post their articles on the web in a way that facilitates easy linking, but you may be able to find a link to a licensed web-based copy of the article in Lippincott Library's database. The [Lippincott librarians](#) are happy to help you with article links.

## Linking to Files you've Posted

Adding files to Canvas is easy, and linking to them is even easier.

To link to a document you uploaded to Files:

1. In Canvas, go to the page or assignment in which you want the link to appear.
2. [Create a file link in a page](#), then save your changes.
