Bloomberg Terminals

Last Modified on 08/04/2026 3:28 pm EDT

Wharton provides access to several tools for exploring real-time and historical market data..

Bloomberg

The Bloomberg Terminals are a proprietary computer software system that provides real-time and historical market data, financial news, analytics, communication tools, and trading capabilities for financial market participants. They are for accessing the Bloomberg Financial Markets data services, and do not have all the other standard applications.

These terminals are not typical Wharton Lab computers; they do not offer the same applications.They also do not support the Bloomberg Excel plugin.

Location of Bloomberg Terminals

Lippincott Library

Lippincott Library hosts a number of Bloomberg terminals available to students. Please contact the Lippincott support team for more information.

Capital IQ

In addition to Bloomberg terminals, Lippincott also offers Capital IQ, a research tool available to full-time MBA students. It provides in-depth reports on financial, analytical, and research of companies, markets, and industries. The S&P Capital IQ Excel Plug-in is not available on the computers in Huntsman Hall.

For more information on Capital IQ, visit the Library's FAQ. If you choose to use the Wharton Research Data Service to access Capital IQ, please refer to the WRDS Account Guide to create an account.

Wharton Reseach Data Services (WRDS)

The Wharton Research Data Service (WRDS) is a web-based business data research service, available to full-time Faculty, Staff, and Wharton Undergraduate, Masters, and PhD students.

Questions?

If you have any issues or questions about any of these services, please contact Wharton Computing Client Support Services.
