# Public Printing Troubleshooting

Last Modified on 03/06/2024 9:11 am EST

This article covers some common problems and their solutions associated with Wharton public printers. If the solution to your problem isn't listed please reach out to the Student Computing team.

## Table of Contents

## No Printers Available on Wharton Public Computers

If you don't see any printers in the Print Dialog box when printing from the Lab, Workstation, or GSR computers, try the following steps:

1. **Open** the **Printer Refresh** folder on the desktop and try attaching to a printer by launching the desired printer shortcut ("Wharton Black & White" or "Wharton Color").
2. If Step 1 doesn't fix the issue, try **closing the application and reopening it**.
