

Laptop Buying Guide (Students)

Last Modified on 08/20/2024 3:14 pm EDT

Students should follow the recommendations below when purchasing a laptop to ensure it is optimized for the Wharton computing environment and course requirements.

Faculty purchasing laptops with departmental funds should contact their **Academic Representative**.

For **mobile device** recommendations see our **Mobile Device Buying Guide** as well as ISC's **smartphone hardware recommendations**.

Laptop Recommendations

Wharton Computing does not recommend specific laptops for students. These guidelines should help you determine which type of laptop will best suit your needs in our computing environment. Consider Penn Computing's [Laptop Purchasing Guide](#) for configuration suggestions.

Purchasing a laptop warranty is highly recommended. Warranties support the repair or replacement of your laptop in the event of accidents or technical problems.

Students are able to purchase at educational discounts using the information at: <https://www.business-services.upenn.edu/access-savings-technology>

 Laptops that have the new **Snapdragon CPU** are not compatible with a large number of software at Wharton. For this reason we do not recommend purchasing and/or using these device at Wharton at this time.

Chromebook Considerations

[Top](#)

While Chromebooks are an affordable alternative, they do not have the same functionality of a laptop running a full operating system such as Windows or MacOS. This means that your experience at Wharton can greatly vary depending on the system or service you are interacting with. For this reason, Wharton **does not recommend** purchasing a Chromebook.

If you're still thinking about purchasing a Chromebook, some things to consider are:

- Microsoft Office is only available via the web interface
- Solstice screen sharing is not supported
- VirtualLab is only accessible via web interface
- Lockdown browser may function in a limited capacity

Respondus Lockdown Browser is required for quizzes and exams by most faculty at Wharton. While Lockdown Browser is available from the Google Play Store, this version **does not support the calculator function**. If your professor did not enable the calculator directly within the exam itself, it will be unavailable for you to use during your quiz or exam.

Software Recommendations/Availability

	Windows	MacOS	Chromebook
Recommended Operating System	Windows 10 Pro or Windows 11	MacOS Ventura 13.4	ChromeOS v77+
Productivity Software	<ul style="list-style-type: none"> • Microsoft 365¹ 	<ul style="list-style-type: none"> • Microsoft 365¹ 	<ul style="list-style-type: none"> • Office Online⁵ • G Suite Apps
Security Software	Windows Defender	Sophos Home	Built-in
Printing?	✓	✓	<ul style="list-style-type: none"> • via Email Printing • via Public Computer
Virtual Lab/Vmware?	✓	✓	Web Client Only
Solstice Screencasting?	✓	✓	✗
Virtualization for Windows	N/A	<ul style="list-style-type: none"> • Virtual Lab/Vmware • Bootcamp² • Parallels³ • VM Fusion⁴ 	✗

¹We recommend using either Microsoft 365 (available for free to all Penn students) or Office 2019 ProPlus.

²Bootcamp is not supported on Apple Silicon (M1) Macs. On Intel-based Macs, we recommend that you have at least 512GB of storage space if you plan to use Bootcamp.

³Windows 10 is not supported on Apple Silicon (M1) Macs. On Intel-based Macs, we recommend that you have at least 16GB of RAM if you plan to install Microsoft Windows 10/11 in Parallels. Windows 11 ARM is supported on Apple Silicon (M1) in Parallels.

⁴VM Fusion is not supported on Apple Silicon (M1) Macs. On Intel-based Macs, we recommend that you have at least 16GB of RAM if you plan to install Microsoft Windows in VMware Fusion.

⁵OneDrive app is available. All other Office products (Word, Excel, PowerPoint, etc.) are only accessible via web interface.

Software Purchases

Software needed for "Whartonizing" your computer is free and is available via download using the directions in [Whartonizing Your Device](#).

Hardware Recommendations

[Top](#)

When looking to purchase a new laptop, it may be hard to distinguish what makes one model better than another. In cases like these, it is often helpful to compare hardware specifications. See below for some tips on how to determine the difference in hardware specifications.

Hard-Drive (a.k.a. Storage)

Your hard-drive is where all your data is stored, from programs to personal files like documents and pictures. It also houses your Operating System (Windows or MacOS) which can sometimes take up to 30GB -- so keep this in mind when looking at storage sizes.

Hard-Drives also come in two types: HDDs and SSDs. SSDs are better with speed, durability, and longevity, but come at a higher cost. Our recommendation is to have at least a 512GB SSD. Use in conjunction with [Cloud Storage Options](#) to maximize productivity, performance, and durability of your data!

RAM (a.k.a. Memory)

RAM assists your computer's other hardware in order to run programs and especially helps if you plan to have multiple programs (or browser windows/tabs) open at once.

For RAM, the more the better. Our recommendation is to have a minimum of 8GB of RAM, but 16GB is preferable for improved performance.

CPU (a.k.a. Processor)

Your CPU handles all calculations your computer has to make, essentially making it the brain of your computer. CPU performance is measured by two factors: number of cores & clock speed (i.e. Dual Core @2.6GHz).

For CPU, the more cores the better. If you choose a CPU with more cores, it's okay if your clock speed is slower.

CPUs may also be listed by brand and model. In general, the higher model numbers are better (i.e. i9 > i7 > i5 or Ryzen 9 > Ryzen 7 > Ryzen 5).

Remote Work Considerations

[Top](#)

If you are working from home you might want to consider the following:

1. **Internet Service Provider:** If you are living off campus, speak to your internet service provider about setup

and installation before moving into your new residence. On the day of service installation, give yourself plenty of time for equipment installation, configuring settings, and testing your wireless speeds and stability. On-campus students will connect to AirPennNet.

2. **Additional Equipment:** If you plan to use video conferencing services (e.g. Zoom) for classes, you might want to consider noise-canceling headphones. We recommend wired headphones to reduce the chance of losing connection during class, and you should also confirm if your laptop has a built-in microphone. Online courses are set up so that you don't need a printer, so it is a personal preference whether or not you'd like the ability to print course materials at home.
3. **Ergonomic Considerations:** If you are spending a lot of time at home, you may want to invest in a quality chair, desk, laptop stand, etc. to maximize comfort and support your body's needs (e.g., back and neck support).
4. **Designated Workspace:** If you have the available space, you can designate a specific workspace that is separate from the rest of your home.
5. **Consider Best Practices for Video Conferencing:**
 - Find a quiet area.
 - Mute your microphone at the start of a meeting.
 - Pay attention to your background and lighting.
 - Speak loud enough for your laptop mic or external mic to pick up sound.
 - If you are using a mobile device instead of a laptop, mount it on something to keep the video steady.

Note: All students with concerns about affording technology for remote learning can approach the [Emergency and Opportunity Fund](#) or [Penn First Plus](#).

For more information, check out [Working and Learning Remotely - Students](#), and [Remote Working Checklist](#)
