

MacMail for Google@Wharton (Students)

Last Modified on 06/28/2021 3:00 pm EDT

This article includes directions for configuring your Google@Wharton Email account in Mac Mail.

Wharton Computing recommends using a web browser like **Chrome** (rather than using MacMail) to access your Google@Wharton Inbox.

Before You Start

You need the following before you can complete this task:

- A Google@Wharton account (Students)
- A MacOS computer

Account Setup

To use your Wharton Email in Mac Mail, there are a few account-specific settings you need to enable.

Configuring Mac Mail

Once you've enabled the account-specific settings in Gmail, you're ready to configure Mac Mail.
