This article includes directions for configuring your Google@Wharton Email account in Mac Mail.

Wharton Computing recommends using a web browser like Chrome (rather than using MacMail) to access your Google@Wharton Inbox.

Before You Start
You need the following before you can complete this task:

- A Google@Wharton account (Students)
- A MacOS computer

Table of Contents
- Account Setup
- Configuring Mac Mail
- Questions?

Account Setup
To use your Wharton Email in Mac Mail, there are a few account-specific settings you need to enable.

Read More ➔

Configuring Mac Mail
Once you’ve enabled the account-specific settings in Gmail, you’re ready to configure Mac Mail.
