Change or Reset your Password
Last Modified on 09/20/2021 9:53 am EDT

This article includes information on how to change your various Wharton and Penn passwords.

For tips & tricks when creating password, see our password guidelines article.

PennKey Username

Your PennKey username is identical to the beginning of your Wharton email address. For example, if your email address is "bobsmith@wharton.upenn.edu" then your PennKey username is "bobsmith".

If you have forgotten your PennKey username, you can try looking yourself up in the Penn Online Directory at https://directory.apps.upenn.edu/directory/jsp/fast.do. If you have not restricted your public profile, you may be able to see your email address and derive your PennKey from it.

Change PennKey Password

Managing your PennKey password is easy using the following links:

- Change a known PennKey password
- Reset a forgotten PennKey password
- More PennKey troubleshooting tools

If you have any problems resetting your password or need further assistance contact the PennKey administrators at pennkey@isc.upenn.edu.

Wharton Password
