

Change Management Simulation: Access the Next Scenario

Last Modified on 06/10/2021 12:36 pm EDT

Change Management is a Harvard Business Publishing (HBP) simulation played in some Wharton MGMT classes. If you have been assigned to play the Change Management simulation and are having trouble completing a scenario, continue reading for troubleshooting steps.

Before You Start

- Turn off ad-blockers in your browser if you have them enabled
- Log into your Harvard Business Publishing student account
- Locate the correct Coursepack where Change Management has been assigned
- Open the Change Management Simulation

Moving on to the Next Scenario

Depending on the configuration your professor has selected, you may need to finish a scenario before moving on to the next scenario.

1. Make sure you have ad-blockers turned off for the Change Management simulation pages. It could be blocking your "complete scenario" pop up window. To turn off ad blockers, use the Help function in your browser or browser extension for specific directions. Make sure to refresh your browser and log out of the simulation and back in again to try and re-trigger the pop up window.
2. Make sure you have reached "Critical Mass" in the scenario you are in. If you have not, you need to keep playing until you either achieve Critical Mass or run out of weeks.

3. If you have reached Critical Mass or run out of weeks, you will see a yellow pop-up window to move on.
 - The pop up window is yellow and will appear if you've achieved critical mass, or run out of weeks. Click **No Thanks, Finish** to move on to the next scenario right away.

- If you did NOT achieve Critical Mass, you can click **Finish** to end the scenario.

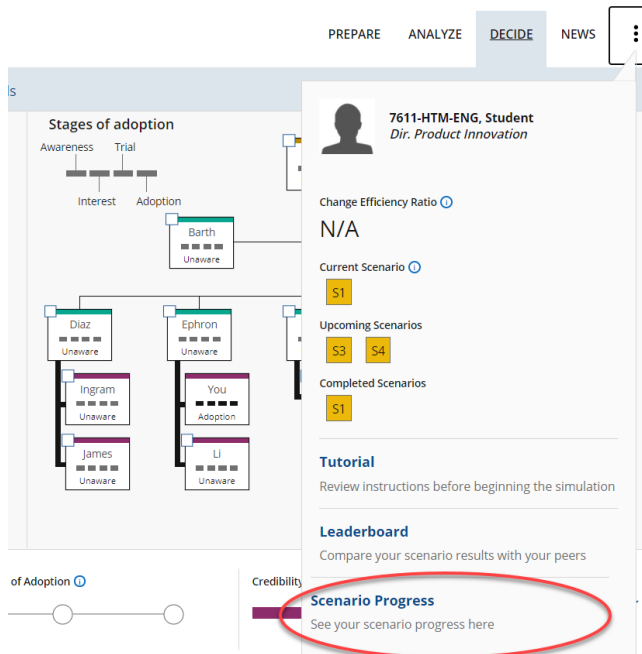

Accessing Your Scenario Dashboard

A list of all your Completed, In Progress, and Not Yet Started scenarios is accessible anytime from within the simulation. Depending on the configuration your professor has selected, you may need to finish a scenario before moving on to the next scenario. You also may only have one chance to play through a scenario or you may be able to play it multiple times. Confirm with your professor if you need clarification before proceeding with the following steps.

1. Click the **horizontal dots** button at the top right of the simulation screen (last button on the right).

2. Scroll down the resulting menu and click **Scenario Progress**.

3. On the Scenario Progress screen, you will see a list of your Not Yet Completed, In Progress, and Completed scenarios. You will most likely only need to focus on the "Completed" section.
 - o If your current scenario is in this list but you're still playing after reaching Critical Mass, you are technically complete.

Scenario Progress				
Not Yet Started				
Scenario				Action
S1				Launch
S3				Launch
S4				Launch
In-Progress Scenarios				
Scenario		Date Started	Weeks Used	Action
Completed Scenarios				
Scenario		Date Completed	Weeks Used	Action
S1		03-MAY-2021	96	

Replaying a Scenario

Depending on your professor's configuration, you might be able to replay a completed scenario.

1. To replay a scenario, click **Launch** under the **Not Yet Started Section**.

Scenario Progress

Not Yet Started

Scenario	Action
S1	Launch
S3	Launch
S4	Launch

In-Progress Scenarios

Scenario	Date Started	Weeks Used	Action
----------	--------------	------------	--------

Completed Scenarios

Scenario	Date Completed	Weeks Used	Action
S1	03-MAY-2021	96	

- You will see a second listing of that scenario under In-Progress Scenarios once you begin the replay. You can move between the In-Progress scenarios at any time by clicking **Resume** for the run you'd like to play.

Scenario Progress

Not Yet Started

Scenario	Action
S1	Launch
S3	Launch
S4	Launch

In-Progress Scenarios

Scenario	Date Started	Weeks Used	Action
S3	03-MAY-2021	0	
S1	03-MAY-2021	67	Resume

Completed Scenarios

Scenario	Date Completed	Weeks Used	Action
S1	03-MAY-2021	96	View
