

# Respondus LockDown Browser (for instructors)

Last Modified on 06/12/2025 1:41 pm EDT

**Respondus LockDown Browser** is a special web browser that helps prevent cheating during in-person proctored online exams (that take place in a classroom or computer lab). Students take the exams using Canvas, but cannot use other programs, take screenshots, copy, paste, print, or navigate to other websites while the exam is in progress.

**Note:** LockDown Browser cannot be used for remote exam delivery; it is available only for in-person exams.

## Before You Start

- LockDown Browser **can only be used for in-person exams**
- LockDown Browser **cannot be used for remote exam delivery take-home exams or quizzes**, as only supervision can ensure that students are not using an additional device.
- If students will use LockDown Browser on personal devices or in a computer lab, contact the Courseware team at [courseware@wharton.upenn.edu](mailto:courseware@wharton.upenn.edu) *at least two weeks* before the first online quiz/exam, preferably.
- Plan to deliver a practice quiz using Respondus LockDown Browser beforehand to help familiarize students with the tool, so that students do not take extra time to set up on exam day.
- LockDown Browser is **not** compatible with iPads for exams using Canvas New Quizzes. Please ask students to use a Windows or Mac laptop for these exams instead. Alternatively, you can offer them a paper copy of the exam.

## Enable Respondus LockDown Browser

Before your students can take quizzes/exams using LockDown Browser, it must be enabled for the course.

[Read More ?](#)

## Using Excel with LockDown Browser

LockDown Browser includes a basic spreadsheet tool that enables .xls/.xlsx spreadsheets to be viewed and edited during an exam session. LockDown Browser has its own basic, built-in spreadsheet function that allows students to use a spreadsheet, but with limited functionality. This functionality is available for Windows, Mac, and iPad editions of LockDown Browser.

To **enable the spreadsheet** function in LockDown Browser, use these steps:

## Day-of-Exam Troubleshooting

If students are having trouble opening the quiz/exam with LockDown Browser, there are a few troubleshooting

steps you can take on your own. You can also contact the Courseware team for assistance.

*We recommend having paper copies of the exam as a backup for students who are unable to open LockDown Browser or log in with two-factor authentication.*

**Note:** If students report any error messages when attempting to view their exam submissions after you have posted grades and released the correct answers, the issue can be resolved by disabling Respondus LockDown Browser through the LockDown Browser tab in Canvas.

## Additional Resources

1. If you are wondering when to use Respondus LockDown Browser versus other approaches, watch Courseware's on-demand session, [Which Canvas Tool Is Right for My Exam?](#) [49:24] which discusses Respondus at length with a number of useful tips.
2. The following resources are helpful when applying the LockDown Browser to specific quizzes:
  - [Delivering Online Exams in-person](#)
3. In addition, these resources are helpful for students:
