# Wharton Virtual Backgrounds

Last Modified on 09/08/2025 5:13 pm EDT

Your computer must meet the [system requirements](#) in order to use Virtual Backgrounds.

Zoom supports “[virtual backgrounds](#)” – pictures or movies that can be set as your background to obscure whatever is behind you on camera.

After setting up your [PennZoom](#) account, you'll find several Penn-related backgrounds you can choose from.

This feature works best with a solid background (or a green screen) and even lighting. If Zoom cannot distinguish between you and the background, you will not achieve the desired effect.

## Using Virtual Backgrounds

The [Virtual backgrounds Zoom documentation](#) goes into detail on how to set/change a virtual background on each Zoom client (desktop and mobile).

**Note:** When changing your virtual background during a meeting, the change takes place immediately and is visible to all meeting attendees (unless you've muted your video).
