

Wharton Virtual Backgrounds

Last Modified on 10/15/2024 2:02 pm EDT

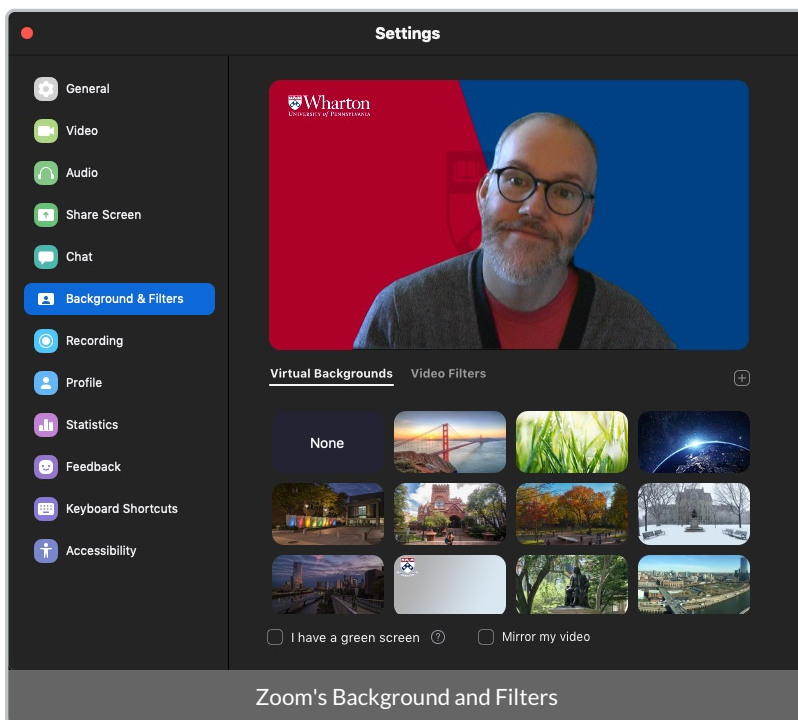

Your computer must meet the [system requirements](#) in order to use Virtual Backgrounds.

Zoom supports “[virtual backgrounds](#)” – pictures or movies that can be set as your background to obscure whatever is behind you on camera.

A variety of Wharton Virtual Backgrounds are available for download:

- [Wharton Virtual Backgrounds](#)

This feature works best with a solid background (or a green screen) and even lighting. If Zoom cannot distinguish between you and the background, you will not achieve the desired effect.

Using Virtual Backgrounds

The [Virtual backgrounds Zoom documentation](#) goes into detail on how to set/change a virtual background on each Zoom client (desktop and mobile).

Note: When changing your virtual background during a meeting, the change takes place immediately and is visible to all meeting attendees (unless you've muted your video).
