Getting Started with aPlus+ in Canvas (Instructors)

Last Modified on 08/06/2024 12:06 pm EDT

aPlus+ is an attendance-tracking tool that is integrated with Canvas through a third-party application. It enables teaching teams to set specific attendance sessions on a timetable in order to manage student check-ins. From an instructor standpoint, the check-ins can be administered manually using custom statuses, or you can allow students to sign in using a specific alphanumeric or QR code, within a timeframe that you specify.

This article describes aPlus+ for faculty use. Students should see the student article, linked here.

Before You Start

You will need:

- Access to Canvas
- Instructor-level access to the class that will use aPlus+ Attendance

For help with either of these, contact your Wharton Computing representative.

Table of Contents

- Accessing aPlus+ Attendance
- Attendance Setup
- Navigating aPlus+ Attendance
- Questions?

Accessing aPlus+ Attendance

As the aPlus+ Attendance tab can be configured in Canvas by any member of the teaching team with a Teacher or TA role, a self-service model for basic attendance integrations is preferred. To do so, select the Settings tab from your course sidebar navigation.

Then, follow the screencast below to drag the aPlus+ Attendance tab from "Hidden" to "Visible" in your course. Make sure to press the blue "Save" button:
Once aPlus+ has been configured in your Canvas site, click on the aPlus+ Attendance tab from your course navigation sidebar:

Account Authorization for First-Time Use

If you are accessing the tool for the first time, you will be prompted to authorize access to your account.

Please note that as the instructor, you will need to click on the aPlus+ Attendance tab prior to first-time student access. If students attempt to access before you initiate, they will receive an error message. Clicking on the tab just once before a new semester will enable student access.

For the final step of the self-service model setup, when you arrive at the Attendance Setup landing page, check the box to "Import attendance sessions from your information systems" and then choose a session weighting. This is explained later in the article, but the recommended weighting is "Equal sessions (1 point)."
Then, click the blue "Apply" button to save your changes:

You will now see your sessions populate on the course timetable as shown in the example below.

**Note:** Make sure that the Sessions tab is selected and you have chosen a section (e.g., 1:45pm MGMT1110-001-Fall2024) in order to see the sessions populate on the timetable.

### Attendance Setup

After authorizing the app to access your account, you will see the *Attendance Setup* landing page. Typically, the attendance sessions will be imported from our information systems as detailed above; however, it is possible to import from course-calendar events, assignments, or even quizzes. If you are planning to use aPlus+ Attendance in a Blueprint course, please contact the Courseware Team at courseware@wharton.upenn.edu.

**Note:** It is still possible to sync with calendar events, assignments, and quizzes when the information systems configuration is already in place.

### Additional Import Options

While Wharton Computing generally imports your course's attendance sessions based on University information, you have some additional import options: Read More→

### Navigating aPlus+ Attendance

Once the Attendance Setup step is complete, you will be brought back to the main aPlus+ timetable. You will see a dropdown where you can toggle among the different course timetables. For example, if a course has multiple
sections, there will likely be a different timetable for each section as shown below:

Students Tab

The Students tab is the most common choice for viewing and managing recent attendance. You have the option to show an attendance-taking timeframe of up to 12 months, and you'll notice that this drills down to the specific session days and the status of each student for that session. Read More →

Sessions

Session view allows you to manage your timetable information: Read More →

Reports

By selecting the ‘Reports’ link in the top menu, you can immediately see attendance reports for your course. Reports can be exported to .csv or Excel by selecting the icon boxed in red at the top right of the data table: Read More →

Codes

Once your sessions are configured and populated on the timetable(s), for any upcoming sessions, you can project either a QR or alphanumerical code that students must scan or enter in the aPlus+ attendance app in order to check in for class that day. Read More →

Canvas Sync & History

If changes are made to the timetable or anywhere else within the aPlus+ application (and also within Canvas, if, for example, grades and assignments are synced with the app), these changes can be synced to ensure everything is up to date: Read More →

Absence Requests

Students now have the ability to request absences for days they will be unable to attend class. As the instructor,
you'll need to ensure that you have your sessions appropriately configured on the timetable so that students have the ability to request an absence. **Note that students can request an absence two weeks prior to a particular session and up until the end of the term.** 

For any other questions related to aPlus+ Attendance that are not addressed in this article, please view the [Canvas instructor guide linked here](#).

**Questions?**

**Troubleshooting tip:** If you are using Safari and encounter any access issues, please refer to the [guide linked here](#) regarding using Safari with Canvas learning tools. If you have trouble in Chrome, try using a different browser, like Firefox.

If you need more assistance, please contact your [Wharton Computing representative](#) for support.
